An internationally renowned wrestler, boxer and gymnast, Imi Lichtenfeld recruited young men who shared his views, but his tactics were no match for armed adversaries. So he focused on creating a form of fighting that combined all the martial arts with a new way of thinking. Tracy Lee Thomas, a master teacher who has been instructing students in the martial arts for more than thirty years, explores how Krav Maga evolved and how to use it to transform your life. He examines its core principles, including: Neutralizing threats: This is the first and foremost objective. Simplicity: The art consists of holds, strikes, and blocks that are simple and efficient. Defense and attack at the same time: By using both techniques in a single move, you can remove the threat as quickly as possible. Constant motion: The objective is to incapacitate the opponent with a continuous series of movements that are aggressively defensive.

Read, Reason, Write unites instruction in critical reading and analysis, argument, and research strategies with a rich collection of readings that provide both practice for these skills and new ideas and insights for readers. Through all of its years, this text has been committed to

showing students how reading, analytic, argumentative, and research skills are interrelated and how these skills combine to develop each student's critical thinking ability.

Insolent and defiant, the Chants de Maldoror, by the self-styled Comte de Lautréamont (1846-70), depicts a sinister and sadistic world of unrestrained savagery and brutality. One of the earliest and most astonishing examples of surrealist writing, it follows the experiences of Maldoror, a master of disguises pursued by the police as the incarnation of evil, as he makes his way through a nightmarish realm of angels and gravediggers, hermaphrodites and prostitutes, lunatics and strange children. Delirious, erotic, blasphemous and grandiose by turns, this hallucinatory novel captured the imagination of artists and writers as diverse as Modigliani, Verlaine, André Gide and André Breton; it was hailed by the twentieth-century Surrealist movement as a formative and revelatory masterpiece.

The legal treatment of sexual behavior is a subject that receives little scholarly attention in the field of Middle East women's studies. Important questions about the relationship between sexuality and the law and about the societies enforcing that relationship are rarely addressed in the current literature. Elyse Semerdjian's "Off the Straight Path" takes a bold step toward filling that gap, offering a fascinating look at the historical progression of Islamic law's treatment of illicit sex. Semerdjian provides a comprehensive review of the concept of zina, sexual indiscretion, exploring the diverse interpretation of zina crime as presented in a variety of sources from the Qur'an and hadith to legal literature. She then delves into the history of legal responses to zina within the specific community of Aleppo, Syria. Drawing on a wealth of shari'a court records, Semerdjian brings to life Syrian society during the Ottoman period. With vivid detail, she describes specific women's lives and experiences as their cases are presented before the court. Semerdjian argues that the actual treatment of zina crimes in the courts differs substantially from sentences prescribed by codified Islamic jurisprudence. In contrast to the violent corporal punishments dictated in the Islamic legal code, the courts often punished crimes of sexual indiscretion with nonviolent sentences, such as removal from the community. Employing exceptional insight, "Off the Straight Path" presents a powerful challenge to the traditional view of Islamic law, enabling a richer understanding of Islamic society.
