Valuation for Financial Reporting: Intangible Assets, Goodwill, and Impairment Analysis provides guidance and insight in the identification and measurement of intangible assets and goodwill pursuant to the Financial Accounting Standards Board Statements of Financial Accounting Standards (SFAS) No. 141, Business Combinations and (SFAS) No. 142 Goodwill and Other Intangible Assets. The new rules are sweeping and complex. Valuation for Financial Reporting will bring clarity to CFOs, auditors, valuation professionals, and CPAs by explaining the valuation aspects of the new financial reporting requirements, including how to identify the characteristics of goodwill and intangible assets, determine if impairment has occurred, and employ specific methods to assess the financial impact of such impairment. While numerous articles and commentaries on the subject have appeared dating back to the time

the FASB began considering the issue, Valuation for Financial Reporting is the first to provide "real world" examples of the valuation techniques and methodologies required to perform a purchase price allocation under SFAS No. 141 and an impairment study under SFAS No. 142. Valuation for Financial Reporting will help lift the veil of mystery surrounding these two important pronouncements and provide a practical guide for their implementation. This book:

- * Shows the CPA and client how to apply the new SFAS 141 rules that pertain to all companies involved in an acquisition (buyer or seller) by analyzing and valuing the tangible and intangible assets acquired.
- * Teaches the CPA and client how to apply the new SFAS 142 rules that pertain to all companies that recognize and measure intangible assets and goodwill which may now be impaired
- * Presents detailed case studies and examples on how to apply and implement SFAS 141 and SFAS 142
- * Provides a "How To" on the identification and measurement of intangible assets.
- * Includes a checklist for controlling the gathering of data necessary for the analyses and another checklist guiding the work program for methodologies
- * Offers guidance and examples for financial reporting purposes.

FAIR VALUE MEASUREMENT Practical Guidance and Implementation "Writing Fair Value Measurement was a monumental task fraught with controversy not only in the U.S., but also abroad. Having coauthored a book with Mark as well as written one myself, I was even more impressed that Mark was able to navigate these fair value minefields and produce a work that will be a tremendous help to accountants and non-accountants alike. If you are looking for a 'one-stop' book on fair value measurement, this is it!" —Neil J. Beaton, CPA/ABV, CFA, ASA, Managing Director, Valuation Services, Alvarez & Marsal "In recent years, the FASB and the IASB have added many requirements for various assets and liabilities to be measured at fair value. In this book, Zyla clearly describes how to implement fair value measurement and how investors and creditors should interpret it. The crisp writing and illuminating analysis will help readers to grasp the essence of fair value accounting and to apply it wisely." —J. Edward Ketz, Associate Professor of Accounting, Pennsylvania State University "The focus of the book is on fair value measurement based on level 3 inputs. This is a critical area of valuations for financial reporting due to a false comfort given by routine application of evaluating models and assumptions without real possibilities of calibration. Mark Zyla offers an extraordinary help in understanding the reliability of the inputs and the outputs of the different methodologies and the inherent biases in each of them. The book is a precious support for better valuation both in

As valuation analysts know only too well, analysts, auditors and CFOs have been on their own in estimating remaining useful lives of intangible assets without significant benchmarks ever since the Financial Accounting Standards Board (FASB) created the uniform procedure whereby the acquiring entity in a business combination must perform a purchase price allocation (PPA) that matches the purchase price to asset values of the acquired company, including, importantly intangible assets. Benchmarking Identifiable Intangibles and Their Useful Lives in Business Combinations delivers a compilation of reported data, particularly on useful lives of intangible assets as reflected in over 360 purchase price allocations. Analysts will use the data to benchmark what intangibles are being discovered, categorized and valued in what industries, and the ratios of individual intangible asset categories to total assets. The guide is easy to use, allowing readers to view the data extracted from over 360 PPAs in three sections: Review of intangible asset categories complete with detailed descriptions of valuation approaches and checklists of factors to consider View data slices organized by intangible View intangible categories data by industry Benchmarking Identifiable Intangibles and Their Useful Lives in Business Combinations also delivers key statistical data that can be used to benchmark non-compete agreements, support statistical claims of the dominance of intangible assets and assist in identifying amortization tendencies.

Early in the twenty-first century, a quiet revolution occurred. For the first time, the major developed economies began to invest more in intangible assets, like design, branding, and software, than in tangible assets, like machinery, buildings, and computers. For all sorts of businesses, the ability to deploy assets that one can neither see nor touch is increasingly the main source of long-term success. But this is not just a familiar story of the so-called new economy. *Capitalism without Capital* shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade, including the growth in economic inequality and the stagnation of productivity. Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles. *Capitalism without*
