Sexual Reflections: A Workbook for Designing and Celebrating Your Sexual Health Plan, (Client Edition) by Alexandra Katehakis, Ph.D., helps you uncover and embrace your unique, optimal sexuality. Carefully researched, designed, and clinically tested, the Workbook gives you a powerful new program to achieve your authentic sexual expression. Meant to be used with your therapist, this cutting-edge body/mind Workbook assists you in attaining personally satisfying and sustainable, healthy sexual experiences that fully align with your own ethical and erotic values. Prepare for some "Aha!" moments as the Sexual Reflections: A Workbook engages you and your therapist in unblinkingly honest, individually-tailored exercises and conversations. This sex-positive guide celebrates and strengthens your unique healthy emotional and erotic intimacy with a partner. The Workbook begins with concrete actions supporting abstinence from sexual behaviors that destroy relationships (such as infidelity) or compromise integrity (such as sexual compulsivity). Having a healthy, satisfying, and therefore sustainable sex life takes a lot more than abstention from problematic sex. Constructing a positive sexuality starts with understanding all aspects of your sexuality -- physical, emotional, cognitive, interpersonal-intrapsychic, and spiritual-and is most objectively done in tandem with your therapist. The Workbook's sections lead you step by step through each of these aspects by presenting thought-provoking questions and emotionally evocative art, by inviting your responses with your own words and images, and by processing your reflections in the next session. Fortright and compassionate, Workbook sections first explore your awareness of your sexual responses, your ability to name and track bodily impulses, and your capacity to trust those impulses as a personal guide to what feels sexually right or wrong to you. Later sections consider how well you maintain healthy boundaries with a lover, how comfortably you can discuss preferred sexual experiences with appropriate others and how your spiritual beliefs might bring joy and meaning, rather than shame or guilt, to your sexual life. Weekly "homework assignments" and processing sessions cover the section topics and help you confirm which sexual acts are okay, not okay, or perfect for you through your bodily-based emotions. This tailored-to-you mind/body process hones your inner reflections, so you and your therapist can help you identify and live your unique, genuine-and thus genuinely sustainable--Sexual Health Plan. Sexual Reflections: A Workbook puts your sex life in your hands as your new skill of tracking your bodily activation guides you to your personal truth. Weekly homework assignments assist you in bridging the gap between what you think fits you sexually versus what your bodily-based emotions telegraph to you about specific sexual acts. Together, your mind and body help you create your Sexual Health Plan that integrates and expresses both your ethical and your erotic values. Sexual Reflections: A Workbook for Designing and Celebrating Your Sexual Health Plan, Client Edition: * Encourages you to reflect on your physical self, thoughts, emotions, personal and sexual values, preferred sex acts, dating and relationship concerns, and spirituality-all to guide you toward a tailored understanding of your sexuality.* Gives you accessible techniques to track bodily and emotional activation. This personal barometer will help you to distinguish sexual arousal from sexual shame or trauma repetition, and to discover your own sexual truth. * Presents art and creative writing to access memory and activate healing and hope.* Guides you in defining an individualized, joyous, and thus sustainable Sexual Health Plan that supports your genuine erotic and ethical values.

The design and analysis of efficient data structures has long been recognized as a key component of the Computer Science curriculum. Goodrich, Tomassia and Goldwasser's approach to this classic topic is based on the object-oriented paradigm as the framework of choice for the design of data structures. For each ADT presented in the text, the authors provide an associated Java interface. Concrete data structures realizing the ADTs are provided as Java classes implementing the interfaces. The Java code implementing fundamental data structures in this book is organized in a single Java package, `net.datastructures`. This package forms a coherent library of data structures and algorithms in Java specifically designed for educational purposes in a way that is complimentary with the Java Collections Framework.

At least 5.6 million to 8 million--nearly one in five--older adults in America have one or more mental health and substance use conditions, which present unique challenges for their care. With the number of adults age 65 and older projected to soar from 40.3 million in 2010 to 72.1 million by 2030, the aging of America holds profound consequences for the nation. For decades, policymakers have been warned that the nation's health care workforce is ill-equipped to care for a rapidly growing and increasingly diverse population. In the specific disciplines of mental health and substance use, there have been similar warnings about serious workforce shortages, insufficient workforce diversity, and lack of basic competence and core knowledge in key areas. Following its 2008 report highlighting the urgency of expanding and strengthening the geriatric health care workforce, the IOM was asked by the Department of Health and Human Services to undertake a complementary study on the geriatric mental health and substance use workforce. The Mental Health and Substance Use Workforce for Older Adults: In Whose Hands? assesses the needs of this population and the workforce that serves it. The breadth and magnitude of inadequate workforce training and personnel shortages have grown to such proportions, says the committee, that no single approach, nor a few isolated changes in disparate federal agencies or programs, can adequately address the issue. Overcoming these challenges will require focused and coordinated action by all.

Knowledge updating is a never-ending process and so should be the revision of an effective textbook. The book originally written fifty years ago has, during the intervening period, been revised and reprinted several times. The authors have, however, been thinking, for the last few years that the book needed not only a thorough revision but rather a substantial rewriting. They now take great pleasure in presenting to the readers the twelfth, thoroughly revised and enlarged, Golden Jubilee edition of the book. The subject-matter in the entire book has been re-written in the light of numerous criticisms and suggestions received from the users of the earlier editions in India and abroad. The basis of this revision has been the emergence of new literature on the subject, the constructive feedback from students and teaching fraternity, as well as those changes that have been made in the syllabi and/or the pattern of examination papers of numerous universities. People all over the world are confronted by issues such as poverty, a lack of access to quality education, unaffordable and or inadequate housing, and a lack of needed health and mental services on a daily basis. Due to these issues, there is a need for social workers who have access to relevant and timely scholarly materials in order to meet the needs of those facing these issues. The social, psychological, and biological factors resulting from these issues determine the level of a person's mental health at any given point in time and it is necessary for social workers to continue to evolve and develop to the new faces and challenges of the times in order to adequately understand the effects of these issues. This book aims to rectify that neglect. A series of introductory chapters describing current research and services available to mothers with serious mental illness are followed by personal accounts of clients reflecting on their parenting experiences. One goal of the book is to provide clinicians with information that they can use to help patients struggling with questions and barriers in their attempts to parent.
