Silvopasture

Silvopasture, one of five agroforestry practices, is of growing interest in Virginia. While trees have benefited Virginia livestock for eons by the shelter they offer, the purposeful integration of trees and forage, whereby both are managed to optimize system outputs, is rarely practiced. Sheep graze among honeylocust trees.

Silvopasture | Virginia Cooperative Extension | Virginia Tech

Silvopasture is a management technique that combines grazing livestock, forestry and pasture management practices. When done properly, silvopasture allows for both timber production and livestock production on the same piece of land. Traditionally, foresters and livestock owners worked very differently.
